

COLLAPSIBLE COOKING STOVE

TO USE:

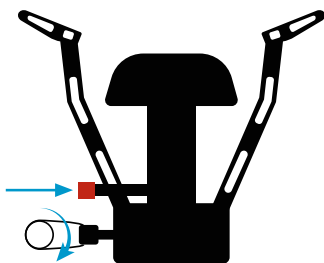

- › Remove stove from its carrying case and make sure that the brass gas knob with wire handle is turned all the way out, counterclockwise.

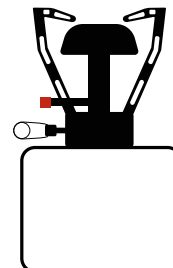

- › Once installed you should hear no gas. If you hear gas, make sure that the gas flow control knob is turned all the way out, counterclockwise.

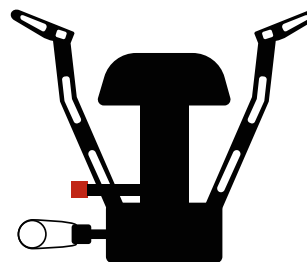

- › Once the arms are in place, ignite the stove by turning the gas flow control knob 1/2 a turn and press the red button.

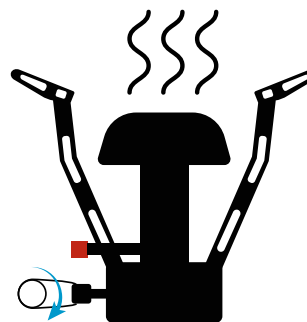

- › Screw on the fuel system to the bottom of the burner.

- › Next rotate all the burner arms out and down, so that the 3 arms make a flat surface to hold any pot or pan.

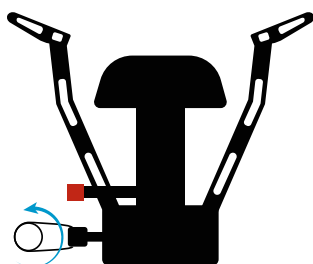

- › You can control the heat by the gas flow control knob.

TO TURN OFF:

- › Turn the gas flow control knob counterclockwise all the way.

- › Allow the stove to fully cool before packing up or touching any of the metal components.
